

## KEY BENEFITS

### ACCESSIBLE FROM ANYWHERE

Access 100% of your accounts receivable features from anywhere using any popular web-browser.

### LOWER UN-COLLECTIBLE DEBTS

Reports and dashboards help you identify problems before they occur. This includes over limit accounts, aging accounts, expiring credit cards, and more.

### ADJUSTS TO YOUR BUSINESS

Use sales contracts to bill recurring fees, one time fees, setup, overage, and other charges.

### STREAMLINE OPERATIONS

Sales, service, finance, and support can all access customer bills and reports according to customized workflow and approval processes.

### FASTER DATA ENTRY, FEWER ERRORS

Predictive entry and flexible screen layouts reduce time spent entering data.

### HIGHER CUSTOMER SATISFACTION

Create HTML, PDF, or Excel documents which can be printed or emailed according to client preferences and billing cycles.

### WORK LOCALLY AND INTERNATIONALLY

Multiple currencies, translation, consolidation, and more.

# ACCOUNTS RECEIVABLE

Manage customer accounts and reduce uncollectible debts by automating tasks and producing reports that can be accessed from anywhere using a web browser

The Accounts Receivable (AR) module is used to enter customer invoices, send customer statements, collect and apply payments, verify customer balances, track sales commissions, and deliver customer reports. The AR module is integrated with all other Acumatica modules.

## KEY FEATURES OF ACCOUNTS RECEIVABLE

<b>Flexible invoice delivery</b>	Create HTML, PDF, or Excel documents which can be formatted for printing or emailed according to client preferences. Copies of all documents are stored with the customer record.
<b>Recurring billing</b>	Bill any type of contract with recurring monthly fees, setup fees, renewal fees, consumption based fees, overage charges, and minimum charge amounts. Create contract templates which specify start and end dates, renewal terms, a billing schedule, line items, and more.
<b>Credit card processing</b>	Integrated, PCI-compliant credit card processing automates billing processes and allows you to manually enter charges, void transactions, and issue refunds.
<b>Deferred revenue recognition</b>	Set deferred revenue codes for each invoice line item to support your revenue recognition requirements. Each deferred revenue code can map to a different recognition schedule.

Ref. Nbr.	Applied To	Type	Date	Posted	Applied	Closed	Description	Amount / Applied	Balance
000705		INVOICE	4/1/2006	03-2006			Project billing	11,021.00	11,021.00
000709		INVOICE	4/1/2006	03-2006			Project billing	10,496.00	10,496.00
000710		INVOICE	5/1/2006	04-2006			Project billing	24,100.50	24,100.50
000711		INVOICE	5/31/2006	04-2006			Project billing	39,577.34	39,577.34
000721		INVOICE	3/20/2009	02-2009			TX1-2-2	396.00	396.00
000722		INVOICE	3/23/2009	02-2009			TX1-2-9	330.00	330.00
<b>Customer Documents Total:</b>								85,920.84	
<b>Customer Unrealized Gain/Loss:</b>								0.00	

Detailed reports help you manage receivables.

## ADDITIONAL ACCOUNTS RECEIVABLE FEATURES AND BENEFITS

FEATURE	DESCRIPTION
<b>AR processing flow</b>	Simplify accounting with a new process flow in AR that applies an open credit memo prior to any other open invoices when processing a customer payment.
<b>Customer portal</b>	View AR balance, browse and download AR documents and statement history, etc.
<b>Multiple AR accounts in GL</b>	Map different groups of customers to different AR accounts in the GL by specifying a default AR account for each customer. Acumatica tracks which account was selected and offsets the correct account and amount when the customer payment is applied.
<b>Support multiple currencies</b>	Issue customer invoices and collect payments in a foreign currency. Customer balances are kept in the foreign currency and your base currency. Currency translation provides real-time adjustments. Acumatica automatically tracks gain and losses on foreign currency transactions.
<b>Automated tax reporting</b>	Utilize a flexible system designed to compute international sales and VAT taxes and prepare reports for tax filing and reporting. Each customer can be assigned a default tax zone which includes the list of taxable items and reporting municipalities.
<b>Balances and credit limits</b>	Limit your exposure to uncollectible debts using credit limits. When entering invoices, you can elect to block invoice processing or issue a warning for customers which are past due.
<b>Payment reversal and application</b>	Reduce time spent matching payments to invoices by applying payments to the oldest outstanding documents. If you void an invalid payment, then all document balances are automatically reversed.
<b>Sales commissions</b>	Automatically compute sales commissions based on your compensation plan. Commissions can be split among multiple salespeople, linked to specific line items, and paid when the invoice is issued or when payment is received.
<b>Overdue charges calculation</b>	Overdue charges are automatically calculated and applied according to the business rules you establish. Overdue charges can be calculated as a percentage, fixed amount, or a minimum charge.
<b>Small balances write off</b>	Simplify operations and reduce costs by writing off small document balances. You specify the eligible customers and the maximum write-off limit.
<b>Track processing centers</b>	Configure the list of processing centers that you will use for cash collection and associate customer payment methods with a particular processing center. The Accounts Receivable module uses this information for automated credit card processing.
<b>Audit trails</b>	Review which user entered and changed the details of any AR transactions. Any potential auditing process will be simplified with notes and supporting electronic documents that are automatically attached to transactions.

## UNLOCK YOUR BUSINESS POTENTIAL WITH ACUMATICA

Acumatica is a leading provider of cloud business management software that empowers small and mid-size businesses to unlock their potential and drive growth.

Built on the world's best cloud and mobile technology and a unique customer-centric licensing model, Acumatica delivers a suite of fully integrated business management applications such as Financials, Distribution, CRM and Project Accounting, powered by a robust and flexible platform.
